

How to prepare measure for ...

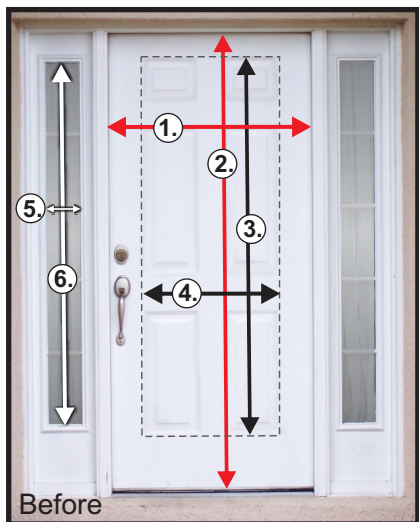

This will definitely save you a trip!

Easy to measure & will help you make choices

Cutting your EXISTING door.

Open the door...

On the Door measure:(inches)

- ① Door width = _____
- ② Door height = _____
- ③ Cutout height = _____
- ④ Cutout width = _____

Sidelights only:

Exposed visible glass

- ⑤ Width visible = _____
- ⑥ Height visible = _____

1. For **DOUBLE** doors, Take your measurements from just the active door (the one you normally walk through) . Ignore the other door for now.

2. Take **PICTURES!**, Smartphone, camera, ipad, whatever you've got! One from the inside and One from the outside. Take them close enough that the **entire doorway opening** shows from top to bottom. Take a distance picture that will show the style of your home. We will try to coordinate a complimentary style for your home.

We've been doing it this way for years! Don't worry!

Remember: **Our installers will be coming to your home to cut the door.** You will be coming to the store to see the glass choices and to place your order. We have a huge selection so allow time!
